Summary

Game Developer with 3 years of professional experience building and shipping 4+ mobile titles on Google Play and the App Store using Unity and C#, with a focus on kids' games. Skilled in Unreal Engine, version control, and leverages AI tools to accelerate development workflows. Additional experience in 3D modeling, texturing, and HTML5 game development with Construct 3.

Skills

Game Development: Unity, Unreal Engine, Construct 3 (HTML5)

Programming Languages: C#, C++, Python, C

Mobile & Backend SDKs: Firebase (Auth, Firestore, Analytics, Remote Config, Cloud Messaging), Google AdMob, Unity Addressables

Version Control: Git, Perforce

3D Art & Modeling: Blender, 3ds Max, Substance Painter

Adobe Suite: Photoshop, After Effects, Premiere Pro, Adobe XD

AI Tools: GitHub Copilot, OpenAI Codex, AntiGravity

Experience

Game Developer

Nov 2022 – Present

Tigris Entertainment Pvt. Ltd. (Green Gold Animation)

Hyderabad, India

- **Shipped 4+ kids' mobile games** on Google Play and the App Store using Unity and C#, including titles based on the popular *Chhota Bheem* IP — [Learn with Bheem](#), [Road Race](#), [Hexa Sort](#), and [Malongh Ka Raaz](#).
- Developed **HTML5 games using Construct 3** for clients including Jio Games and Glance, delivering browser-based interactive experiences.
- Integrated **Firebase** services across projects including Authentication, Realtime Database, Firestore, and Analytics to support live game operations and user tracking.
- Utilized **Firebase Remote Config** to manage game balancing and feature rollouts without app updates, and **Cloud Messaging (FCM)** for player re-engagement push notifications.
- Implemented **Google AdMob** for in-game advertising and **Unity Addressables** with remote server delivery for optimized asset loading and OTA content updates.
- Built **custom Unity Editor tools** using AI-assisted workflows (GitHub Copilot, OpenAI Codex) to automate repetitive tasks and accelerate team productivity.
- Managed source control and team collaboration using **Git and Perforce** across multiple concurrent projects.

Game Developer Intern

Aug 2022 – Nov 2022

Alva Productions

Kuala Lumpur, Malaysia

- Worked on PC and console game projects using **Unity and Unreal Engine**, gaining hands-on experience in cross-platform game development pipelines.
- Collaborated with an international team, contributing to gameplay mechanics and level design under production timelines.

Personal Projects

SpendWise – AI-Powered Finance Tracker | [GitHub](#)

Personal Project

Kotlin, Jetpack Compose, Gemini Nano, Room Database

- Built a production-ready Android app that automatically classifies expenses and income from incoming SMS using on-device AI (Gemini Nano) and cloud AI fallback — no manual input required.
- Features fully automatic transaction tracking and an insights dashboard, built entirely offline-first.

Education

BSc (Hons) in Computer Games Development

2020 – 2023

Asia Pacific University

Kuala Lumpur, Malaysia

- CGPA: 3.63 / 4.00
